

Technical Data Sheet

Description

DSL Summer Concrete Form Oil is a ready to use mixture of process oils and naturally derived chemical release agents that prevent bonding of concrete to form. DSL Summer Concrete Form Oil is designed for use on all types of forms including wood, steel, aluminum, fiberglass and plastic. It can be used daily on equipment and tools to prevent or soften concrete buildup.

Features

- * Does not contain “diesel”
- * Excellent mold release
- * Does not discolor or stain concrete
- * Prevents build up on forms
- * Prevents corrosion on forms

- * Easily applied

Application

Surfaces should be clean of hardened concrete. On steel forms, remove rust and residues to ensure the best results. It is best if applied by low pressure sprayer to ensure a light, even coating. When applying via brush, roller or sponge, care should be taken to apply as thinly as possible to guarantee the best results. Forms should be re-coated before each use.

Properties

<u>Product Code</u>	<u>SL601</u>
Viscosity, cST @ 40°C	9.6
Viscosity, cST @ 100°C	2.75
Flash Point, ° F	170
Pour Point, ° F	-21
Color	1.0 – 2.0
Staining	None
